

Exhaust Systems

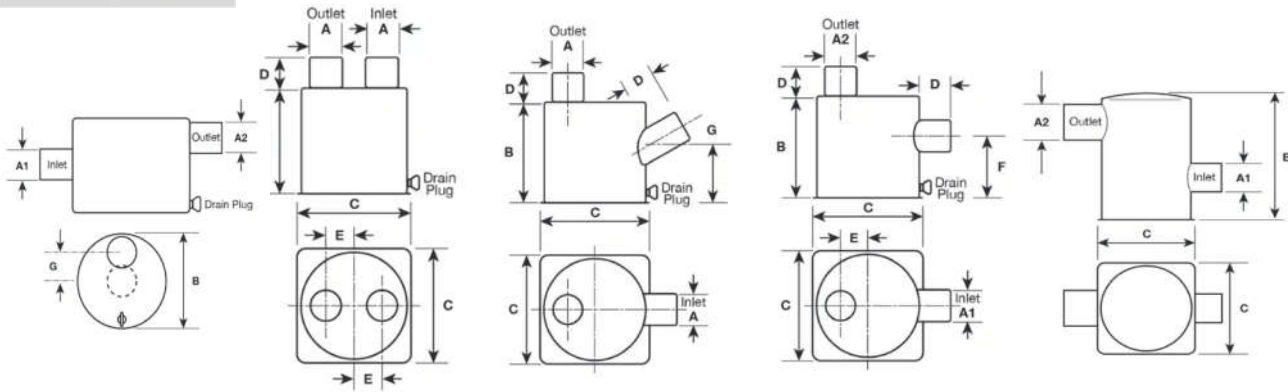

Halyard

Managing engine noise, smoke and vibration, as well as your overboard discharges is becoming increasingly important. Halyard offers the most advanced products available to achieve this, with standard components and designed bespoke solutions that are project managed to meet your requirements.

Halyard provides a standard range of lift silencers in different geometries to suit customer installation requirements. For more complex installations we can also provide dual chamber silencers for improved noise attenuation, or combined silencer separators

Halyard Exhaust Hoses -Available as wired to end or with soft cuffed ends to aid hose clamping. Halyard wire reinforced flexible range of exhaust hose. The hose has a temperature rating of Continuous: 100C /140C. For intermittent ratings please call for further information. The hose is available from 38mm ID up to 458mm.
